Professional Summary

A 2026 B.E. graduate in Artificial Intelligence and Machine Learning with a strong foundation in Python, Object-Oriented Programming (OOP), Data Structures, and Algorithms. Hands-on experience building REST APIs using Flask and FastAPI, working with SQL databases, and using Git for version control. Familiar with web development fundamentals including HTML, CSS, and JavaScript. Seeking an entry-level Software Engineering role where I can apply strong problem-solving, backend development, and software engineering fundamentals to build scalable applications.

Education

B.E in Artificial Intelligence and Machine Learning - The Oxford College of Engineering | 2026

CGPA: 8.1/10

Pre University (12th) – Mountain View PU College | 2022

Grade: 90%

School (10th) – J V S English High School | 2020

Grade: 92%

Technical Skills

Programming & Tools: Python, SQL, Git

Computer Science Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

Backend & APIs: REST APIs, Flask (basic) , FastAPI

Web Development: HTML, CSS, JavaScript (basics), Streamlit

Projects

Speech Driven NLU Data Analytics Chatbot | [GitHub](#) | [Demo](#)

- Developed a multilingual voice-enabled web application that allows users to upload CSV datasets and perform data analysis through natural language queries, making data exploration accessible to nontechnical users.
- Built a Flask-based backend that uses an LLM and dataset context to translate natural language queries into executable Pandas expressions, generate speech-based responses and stores interaction logs using SQLite and SQLAlchemy.

Secure Vault: Cryptographic Credential Management System | [GitHub](#) | [Demo](#)

- Developed a secure credential management application featuring a custom-themed Streamlit interface that allows users to generate, store, and manage account credentials through an encrypted and easy-to-use experience.
- Built and tested a FastAPI backend for authentication and credential management, implemented AES-128 encryption to secure sensitive data, and used MySQL for data storage and persistence.

LegacyATS: Automated ATS Simulator | [GitHub](#) | [Demo](#) | [Live](#)

- Developed a Streamlit-based ATS simulator that evaluates resumes against job descriptions, generates compatibility scores, and identifies formatting and keyword gaps.
- Built and tested a FastAPI backend for resume parsing, writing unit tests with pytest and integrating an LLM to provide ATS-focused recommendations and optimized resume content generation.

Certificates

- Python Full Course (Beginner to Advanced) – GeeksforGeeks
- SQL – HackerRank
- HTML & CSS – LetsUpgrade
- Cloud Computing Fundamentals - IBM
